

LAKE ANNE EAST VEGETATION SCHEDULE

Table with columns: CONTAINER PLANTING ZONE, SPECIES GROUP, SPECIES, INDICATOR STATUS, FUNCTIONS, PRIMARY SPECIES, PLANT PART, SEASON, PLANT SPACING, CONTAINER SIZE, RATE, AND QUANTITY, PLANTING QUANTITIES (BASED ON ONE-GALLON SIZE), AREA (SF), AREA (AC), AREA (AC): LENGTH (LF), A, B, C, D, E, F, G, H, J.

SEEDING SCHEDULE

Table with columns: SEED PLANTING ZONE, SPECIES GROUP, SPECIES, INDICATOR STATUS, FUNCTIONS, PRIMARY SPECIES, PLANT PART, SEASON, SEEDING RATE (LBS/AC), AREA PER PLANT (AC), QUANTITY (LBS), SEEDING QUANTITIES, A, B, C, D, E, F, G, H, J.

TURFGRASS AREA SEEDING SCHEDULE

Table with columns: SEED PLANTING ZONE, SPECIES, SEEDING RATE, AREA PER PLANT, QUANTITY.

SEEDING TOTALS

Summary row for seeding totals: 200.00, 46.00.

SEEDING NOTES:

- 1. Substitutions for selected species based upon availability shall be requested in writing to engineer documenting the lack of availability if the flexibility inherent in the above schedule is still not sufficient. Engineer is under no obligation to approve substitutions.
2. All seeding rates are expressed in pounds of pure live seed (PLS).
3. Grassland Area to be seeded according to the Minimum Care Lawn specifications included in Table 3.32-D of the Virginia Erosion and Sediment Control Handbook, Third Edition.

PLANTING AND SEEDING NOTES

- 1. It is expected and preferred that all species in each of the Species Groups are planted. The tolerances listed in this note are intended to incorporate flexibility according to species availability. At a minimum, Contractor to provide at least:
a) 3 of the 4 species in Group 1, h) 4 of the 6 species in Group 8,
b) 3 of the 4 species in Group 2, i) 3 of the 4 species in Group 9,
c) all of Group 3, j) 5 of 6 species in Group 10,
d) 6 of the 7 species in Group 4, k) 5 of 7 in Group 11,
e) 3 of the 4 species in Group 5, l) 6 of 8 in Group 12,
f) 3 of the 4 species in Group 6 (with Salix nigra a required species), m) 4 of 5 in Group 13,
n) 5 of 8 in Group 14, and
g) all of Group 7, o) 5 of 6 in Group 15.
2. Substitutions for selected species based upon availability shall be requested in writing to engineer documenting the lack of availability if the flexibility inherent in the above schedule is still not sufficient. Engineer is under no obligation to approve substitutions.
3. The planted trees and shrubs shall be randomly spaced and species mixed throughout the planting areas.
4. Container rates and quantities shown for one gallon size. For purposes of substitution, two tubelings are the equivalent of one 1-gallon container plant in this schedule. Contractor may provide a mix of container and tubing sizes for each species requirement, provided the ratio of tubelings to containers is not less than 2:1.
5. Group 6 (Stream Edge) zone shall be planted with tubelings, or as livestock (Salix nigra only, and only between February 1 and March 31). No one gallons are required to be used for any of this Group's species.
6. Stream Bank and Stream Edge zones shall be planted such that the combined mix of species is spaced approx. 3' O.C. and 1' O.C., respectively. These zones shall not be planted such that each individual species in these zones is planted at these rates, resulting in tighter spacing.
7. All seeding rates are expressed in pounds of pure live seed (PLS).
