

## MEMORANDUM

September 15, 2009

**TO: Residents near The Glade "Beaver Area"**

**FROM: Larry Butler, Director of Parks and Recreation, RA**

**RE: Meeting to Discuss the Beaver Fence**

On **Saturday September 26, 2009, at 1:30 PM** and immediately following the meeting being hosted by Wetland Studies and Solutions, Inc. (WSSI) on Reaches 5 and 6 of The Glade stream restoration, RA will be hosting a discussion on the beaver fence.

As many of you are aware, RA installed wire fencing approximately 15 years ago to protect homeowner property as well as RA property for our mutual benefit - creating an area in which beavers could live, and not readily extend their activities beyond the area fenced.

Given the stream restoration work scheduled in the next few months for this area, RA believes it is a good time to discuss the advantages and disadvantages of having an area fenced in which beaver activity can be restricted. We are hoping to gather public input on this matter and encourage your staying after the earlier meeting to participate.

The location will be the Hunting Horn basketball court, the same location as the previous WSSI meetings on The Glade Reaches 5 and 6. The enclosed memo regarding the Reaches 5 and 6 meeting has a map showing this location.
